*"The choice of a lawyer is an important decision and should not be based solely upon advertisements."*

# Nancy Summers had a Medicare Advantage Plan ...

but not anymore!

When Nancy agreed to sign up for a Medicare Advantage plan, she thought she was *keeping* her traditional government Medicare, and simply getting *additional* benefits. She never dreamed she was sacrificing her proven and dependable red-white-and-blue government card for a *replacement* plan. Sadly, it's a common misconception in the United States.

But then the bills began arriving. Under her new Advantage plan, the very same monthly procedure that had cost her \$12.33 under government Medicare in combination with a supplement (Medigap) policy, was now costing her anywhere from \$865 to \$3,949 per month!

Since she had been on the Advantage plan less than one year, Nancy was able to quickly revert to government Medicare, a Medigap plan, and a Part D plan for pharmaceuticals.

**Nancy's message:** "Don't give up your *traditional government Medicare*. The devil is always in the details! You may have a zero-dollar premium up front with an Advantage plan, but you'll pay on the back-end through copayments and out-of-pocket expenses. Contrary to their advertising, *nothing is free!*"

*A public service announcement from  
 Cameron Regional Medical Center*

# October is National Breast Cancer Awareness Month.

**Q. WHO IS AT RISK?**  
A. Your grandmother, your mother, your aunt, your sister, your daughter, your cousin, your friend, your co-worker and **YOURSELF**.

Help to educate women about the importance of early breast cancer detection, diagnosis and treatment. Annual mammography screenings can detect breast cancer early and are the best chance women have for beating this deadly disease.

Breast cancer is the most common cancer in women and falls only second to lung cancer as a leading cause of cancer death. Encourage every woman you know to schedule a mammography screening for herself today. It could save her life.
